PROFESSIONAL SUMMARY

I'm a results-driven full-stack web developer with a strong foundation in PHP, JavaScript, and MySQL, now expanding into the world of data science. With hands-on experience building secure, scalable, and user-focused web applications, I'm passionate about using technology not only to solve problems but to create meaningful, real-world impact. Currently growing my skills in data analysis, machine learning, and automation, I bring a blend of creativity, curiosity, and technical expertise to every project. I thrive in environments where I can build, learn, and lead — always aiming to deliver value that drives both innovation and business growth.

TECHNICAL SKILLS

- **Languages & Frameworks:** HTML, CSS, JavaScript (React, Node.js), PHP, MySQL, MQL
- **Tools & Technologies:** API Development, System Automation, Git, Web Security, XAMPP
- **Currently Learning:** Python, Pandas, Scikit-learn, Data Visualization
